

# World clusters

120 kya southern africa a single cultural area

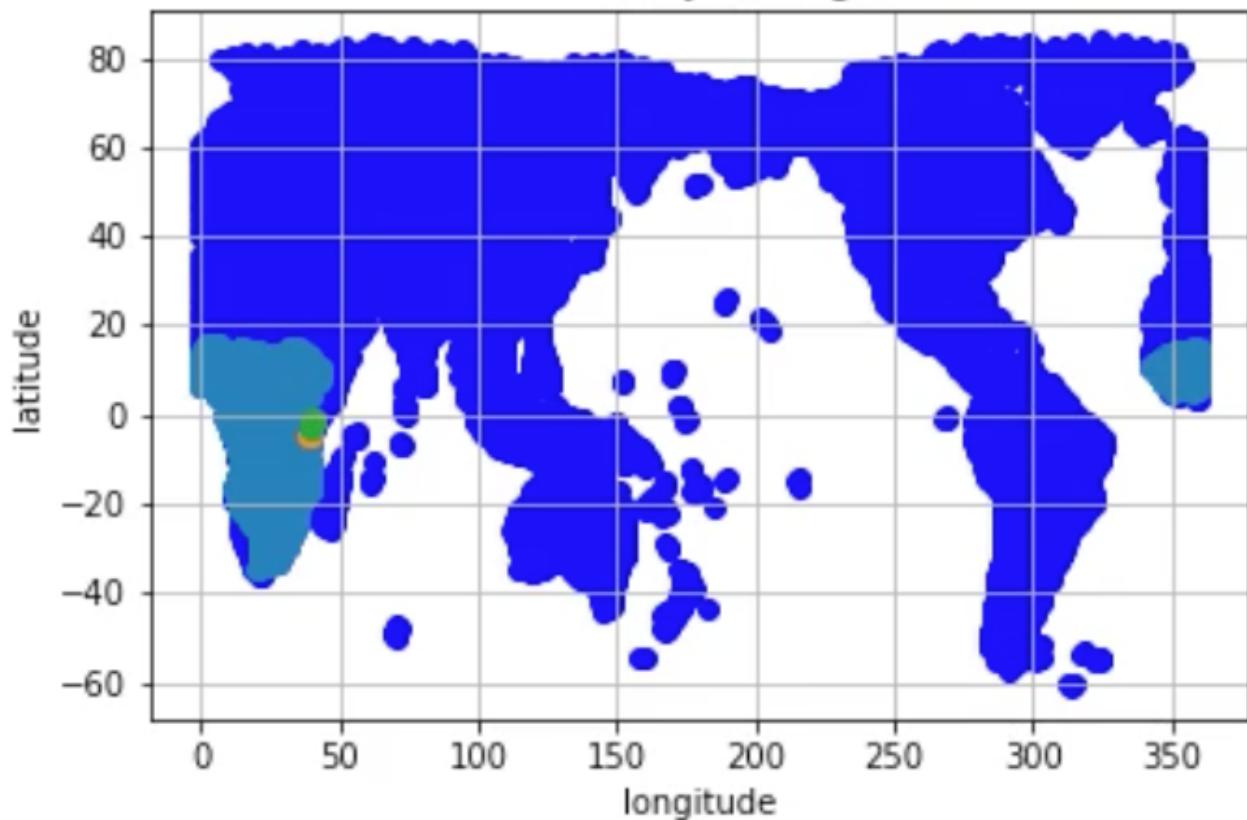

Occasional occupation of small bits of Europe but never lasting

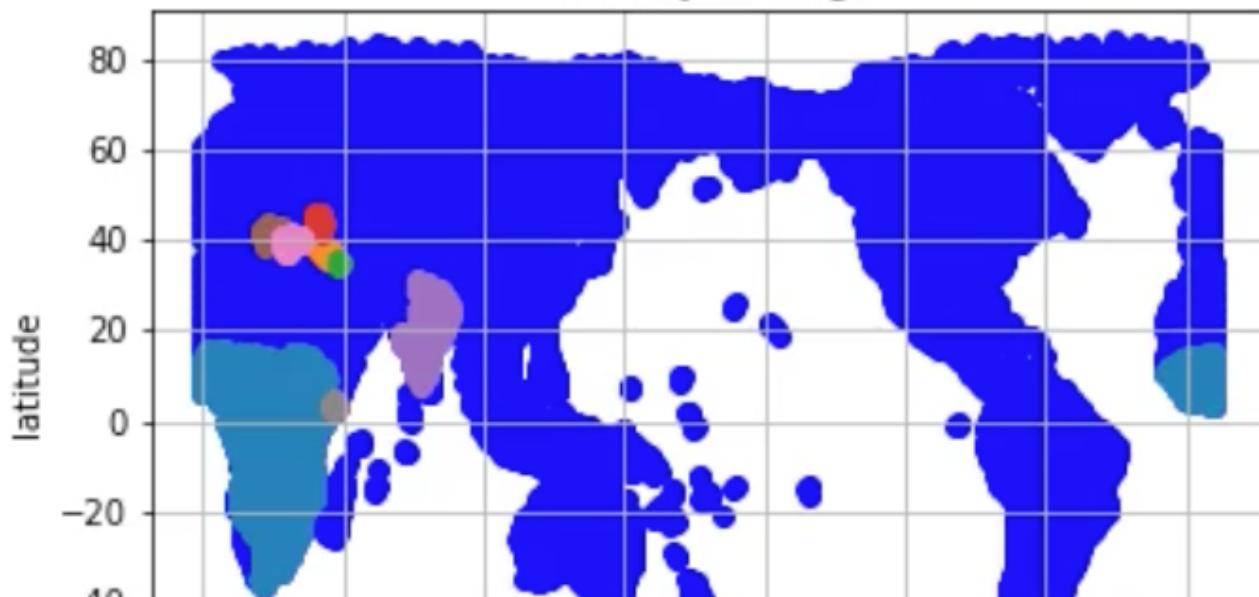

Emergence of new clusters in E. Africa (origin for out of Africa??)

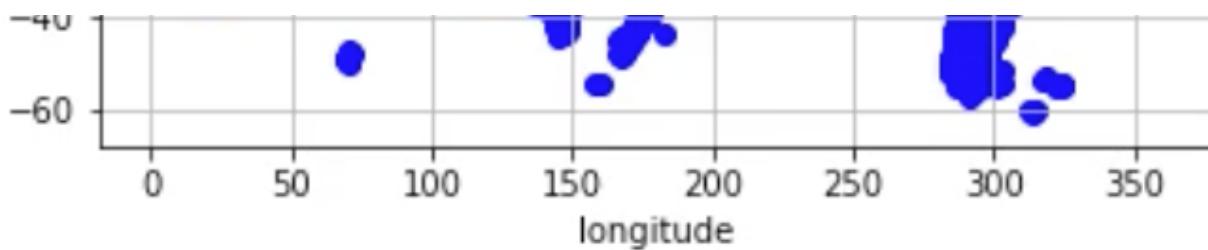

108000 years ago

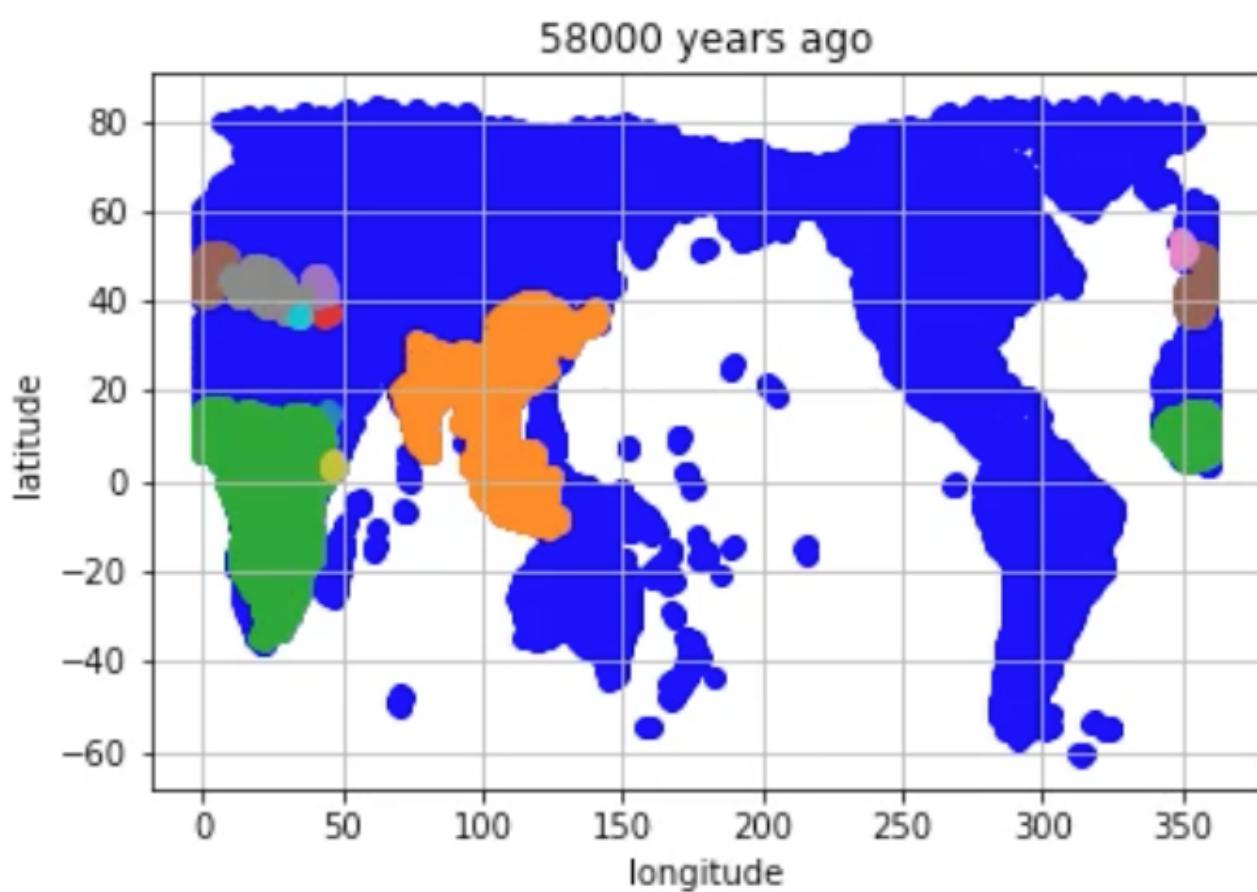

Emergence of multiple middle eastern clusters. Large cluster in Indian sub-continent.

61000 years ago

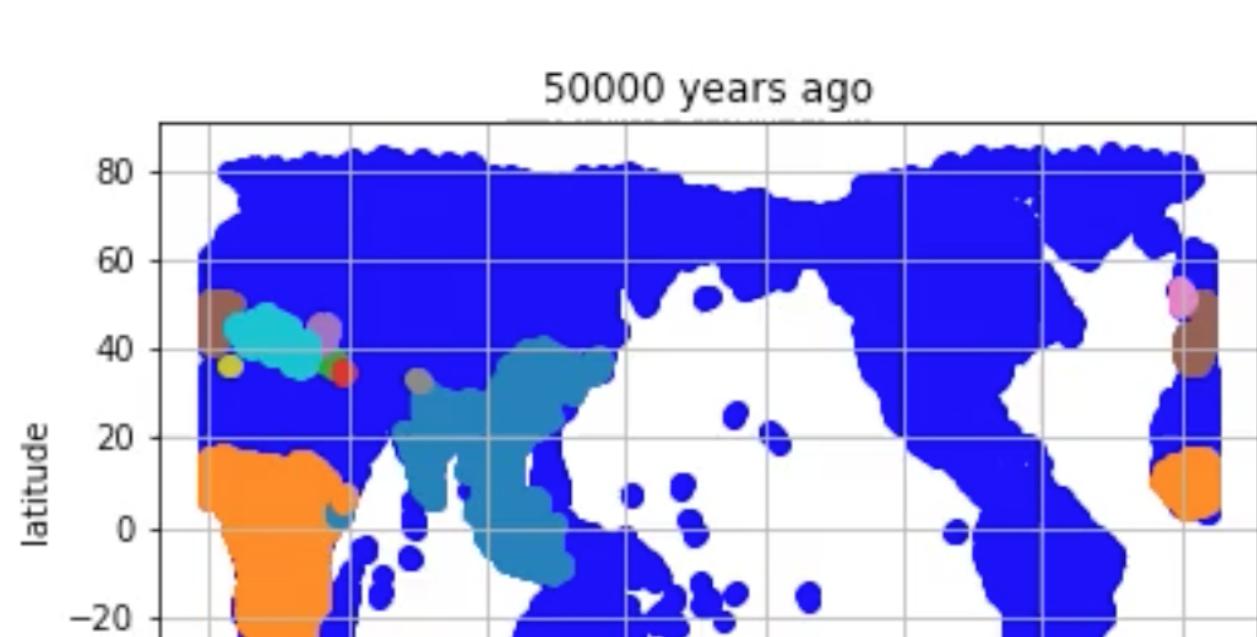

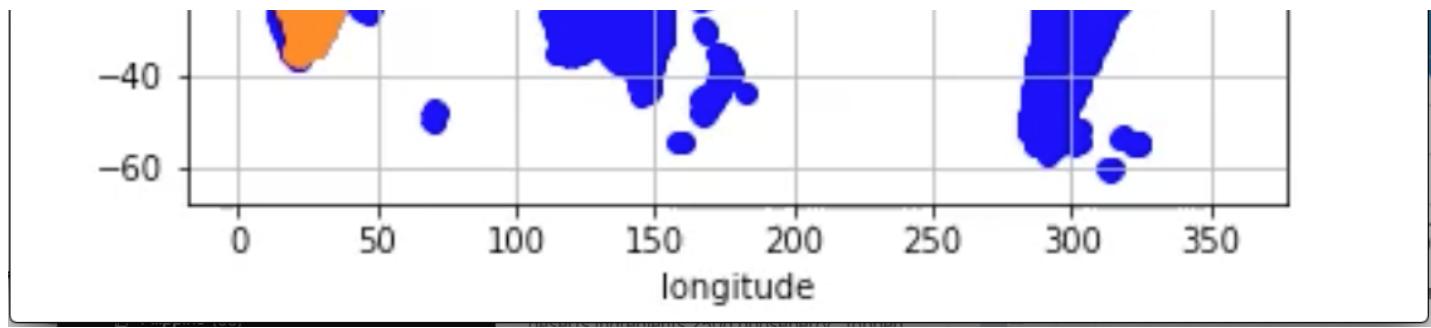

Expansion into SE asia and w. europe

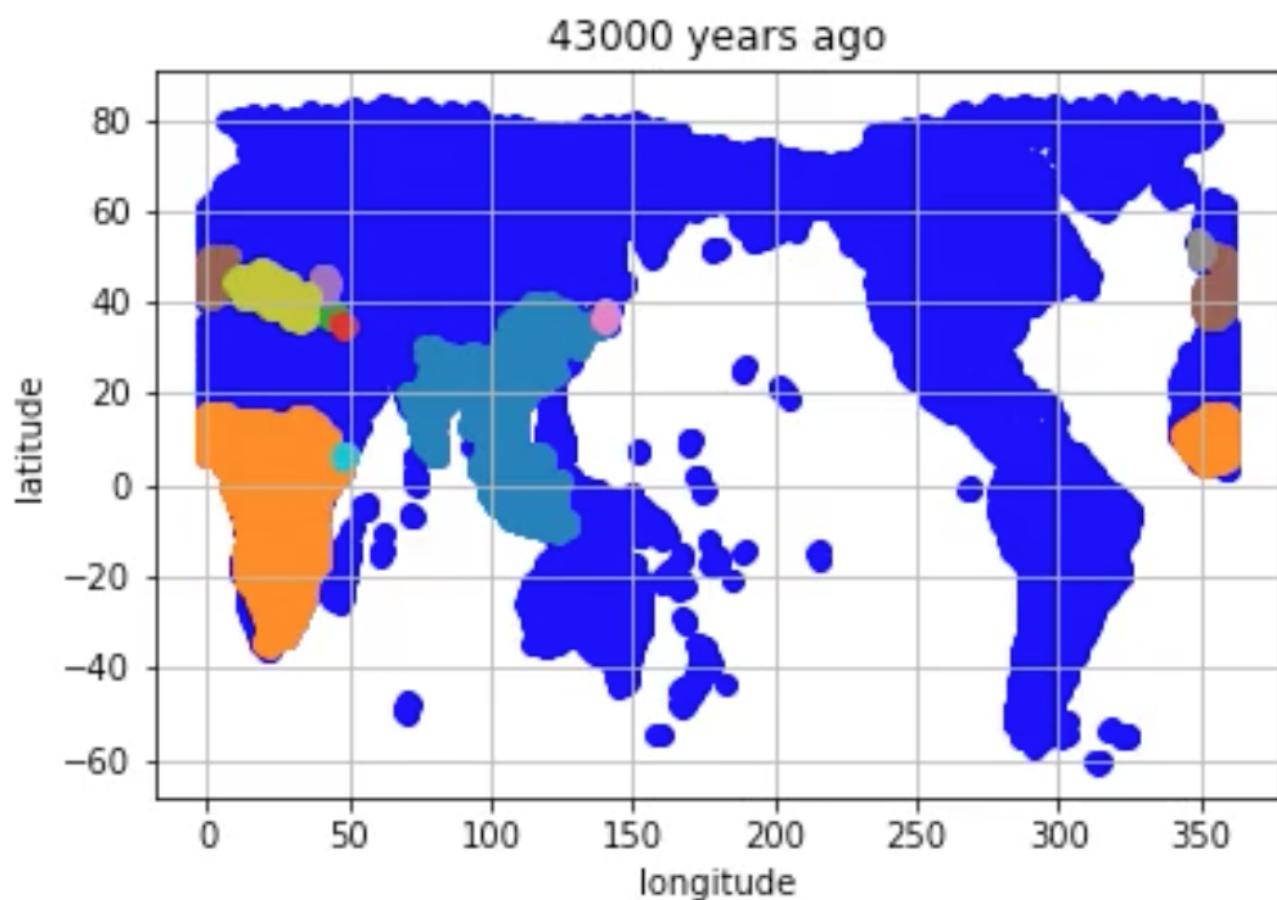

Europe and Middle East still very fragmented.

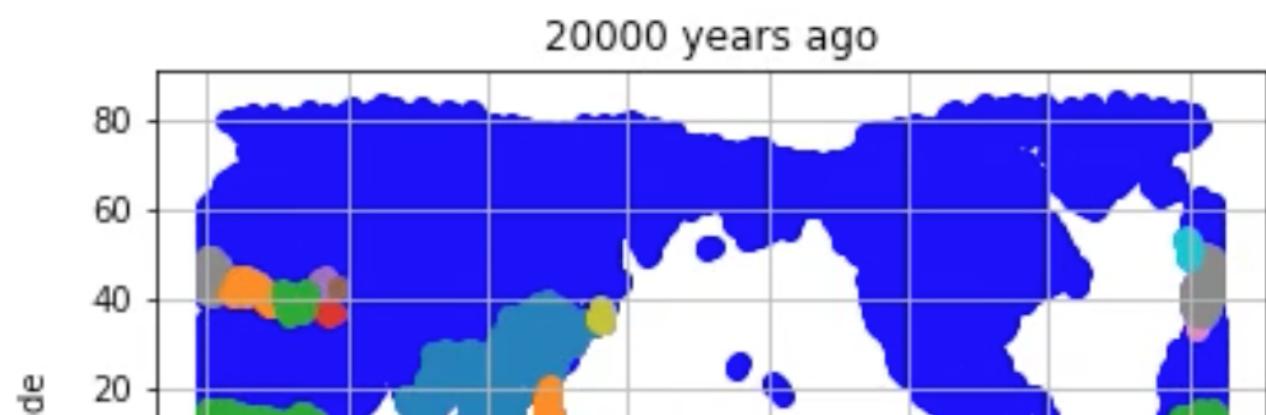

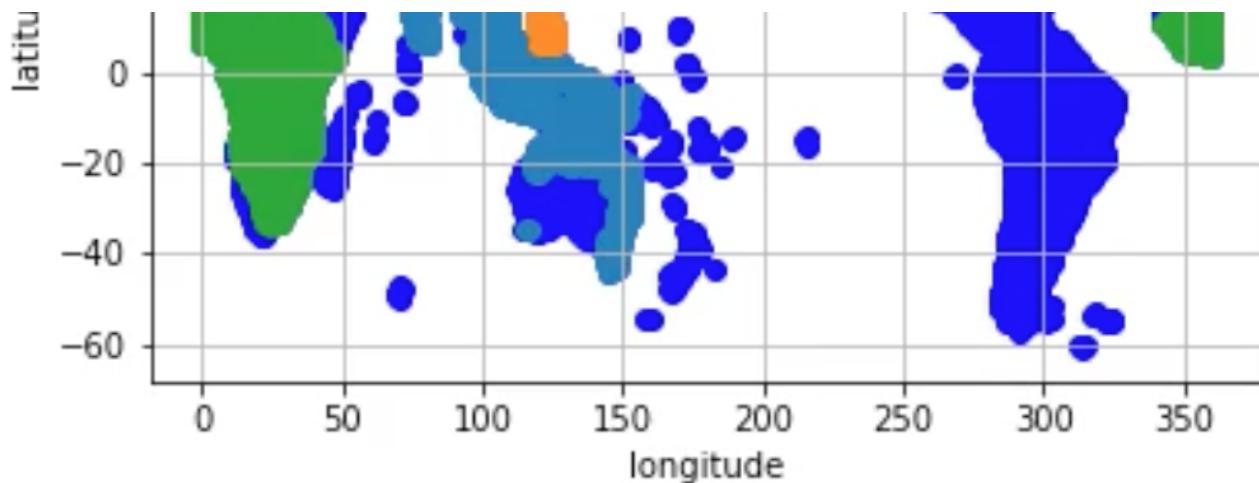

Note: strong se asian cluster but nothing in australia yet. Several separate clusters in Europe and ME

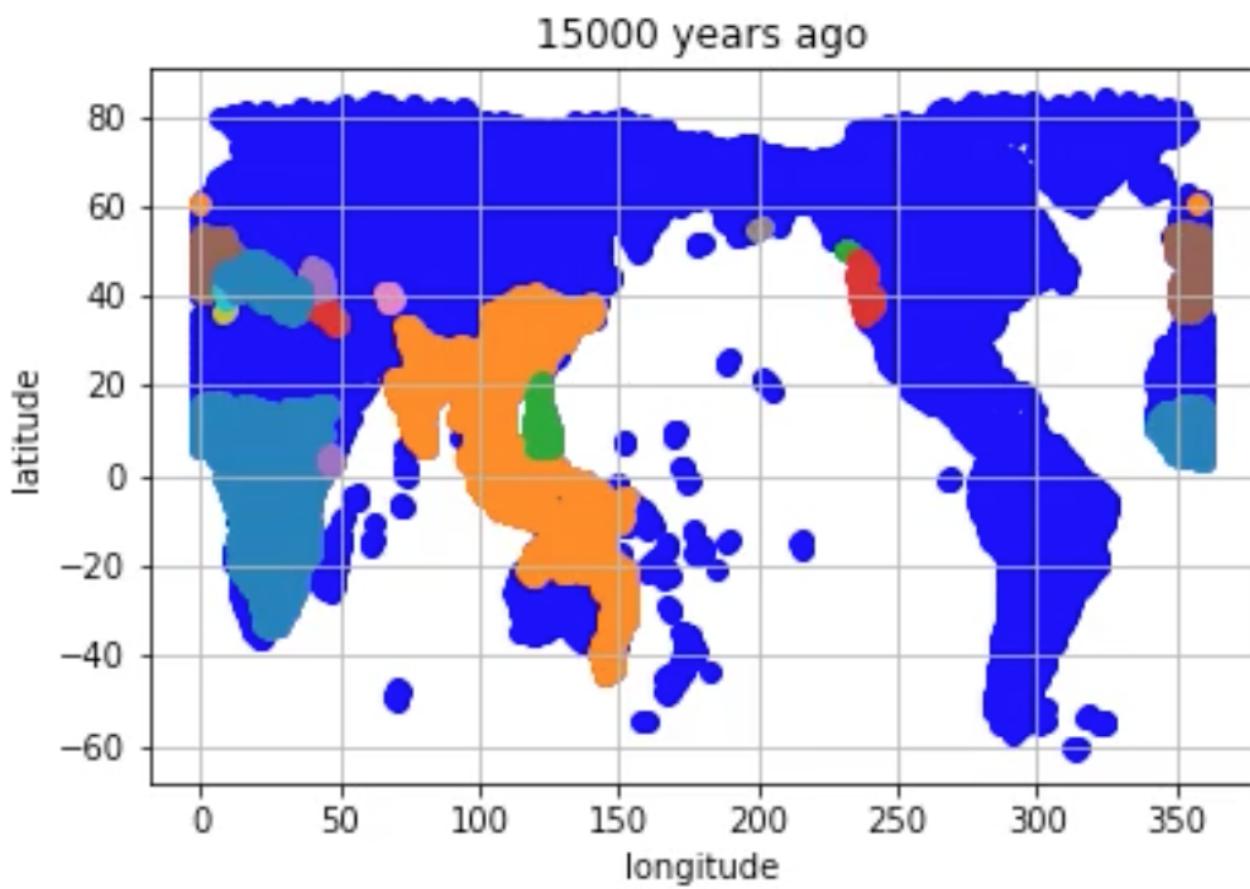

SE Asia and Australia is a single cluster

Beginning of colonization of N. America

This is the time of the Neolithic revolution. The European-ME cluster starts to unify. New clusters in N. - Central America. Australia separates from SE Asia
